When we have a good supply of a variety we do not always stick to the number stated, so if there are some extras "donot throw them away".

BABY BULBS

Baby bulbs are the small bulbs first year's growth from the bulblets and make the number 6 and 7 bulbs and are $\frac{1}{4}$ to $\frac{1}{2}$ inch in size. These should all grow and some varieties produce flowers and all make large bulbs which should give nice blooms next year.

We have been offering the baby bulbs in a mixture for the past two years and have had good reports from customers who have had them. This year we are offering them in named varieties at only a small advance in price over the bulblets. We believe in the long run these will be cheaper than the bulblets and besides you gain a whole year in getting large flowering bulbs.

DELPHINIUM

We have a few thousand seedling Delphinium plants we have grown from our own seed. Selected from the most beautiful, individual and outstanding plants. Many of them over six feet tall with floral heads from two to three feet. The plants from which this seed was gathered are from the best selections of English, French and American strains.

You know Delphinium, if given proper care will last for several years, and if you cut them off when through blooming, at the top of the ground, working in a little fertilizer around them, not too close to the plants. Give them plenty of water and you will get another nice flowering spike in the fall, not quite as large as the first, but really worth while.

We are offering them at these very low prices, and it will surely pay you to take advantage of it.—They will bloom this year with proper care.

8 for 25c—20 for 50c—50 for \$1.00

We have a few hundred two year old plants at 25c and 50c each. The choicest one from which our seed is gathered—\$1.00 each.

CHASTA DAISY SEEDLINGS

They are from plants from seed bought from Richard Diener, who has produced the finest Daisies in the world. Some come double and hardly two exactly alike.

This year, as dry as it was they attracted a great deal of attention. Some of the individual flowers measuring four to five inches.

They should give good blooms this year with proper care.

We only have about 200 of these plants to spare this spring.

Price 2 for 25c—1 Doz. \$1.25.
